CAMEA in Numbers

- » Founded in 1995 by a group of researchers from Technical university of Brno
- » Focused on R&D in the field of image and signal processing, computer graphics and hardware accelerated real-time processing
- » A strongly customer-focused company
- » Certified with ISO 9001:2016
- » 100+ employees (40+ in R&D)
- » 850+ Lanes WIM
- » 100+ Red Light Enforcement
- » 400+ Lanes Speed Enforcement
- » 2000+ Cameras in Industry

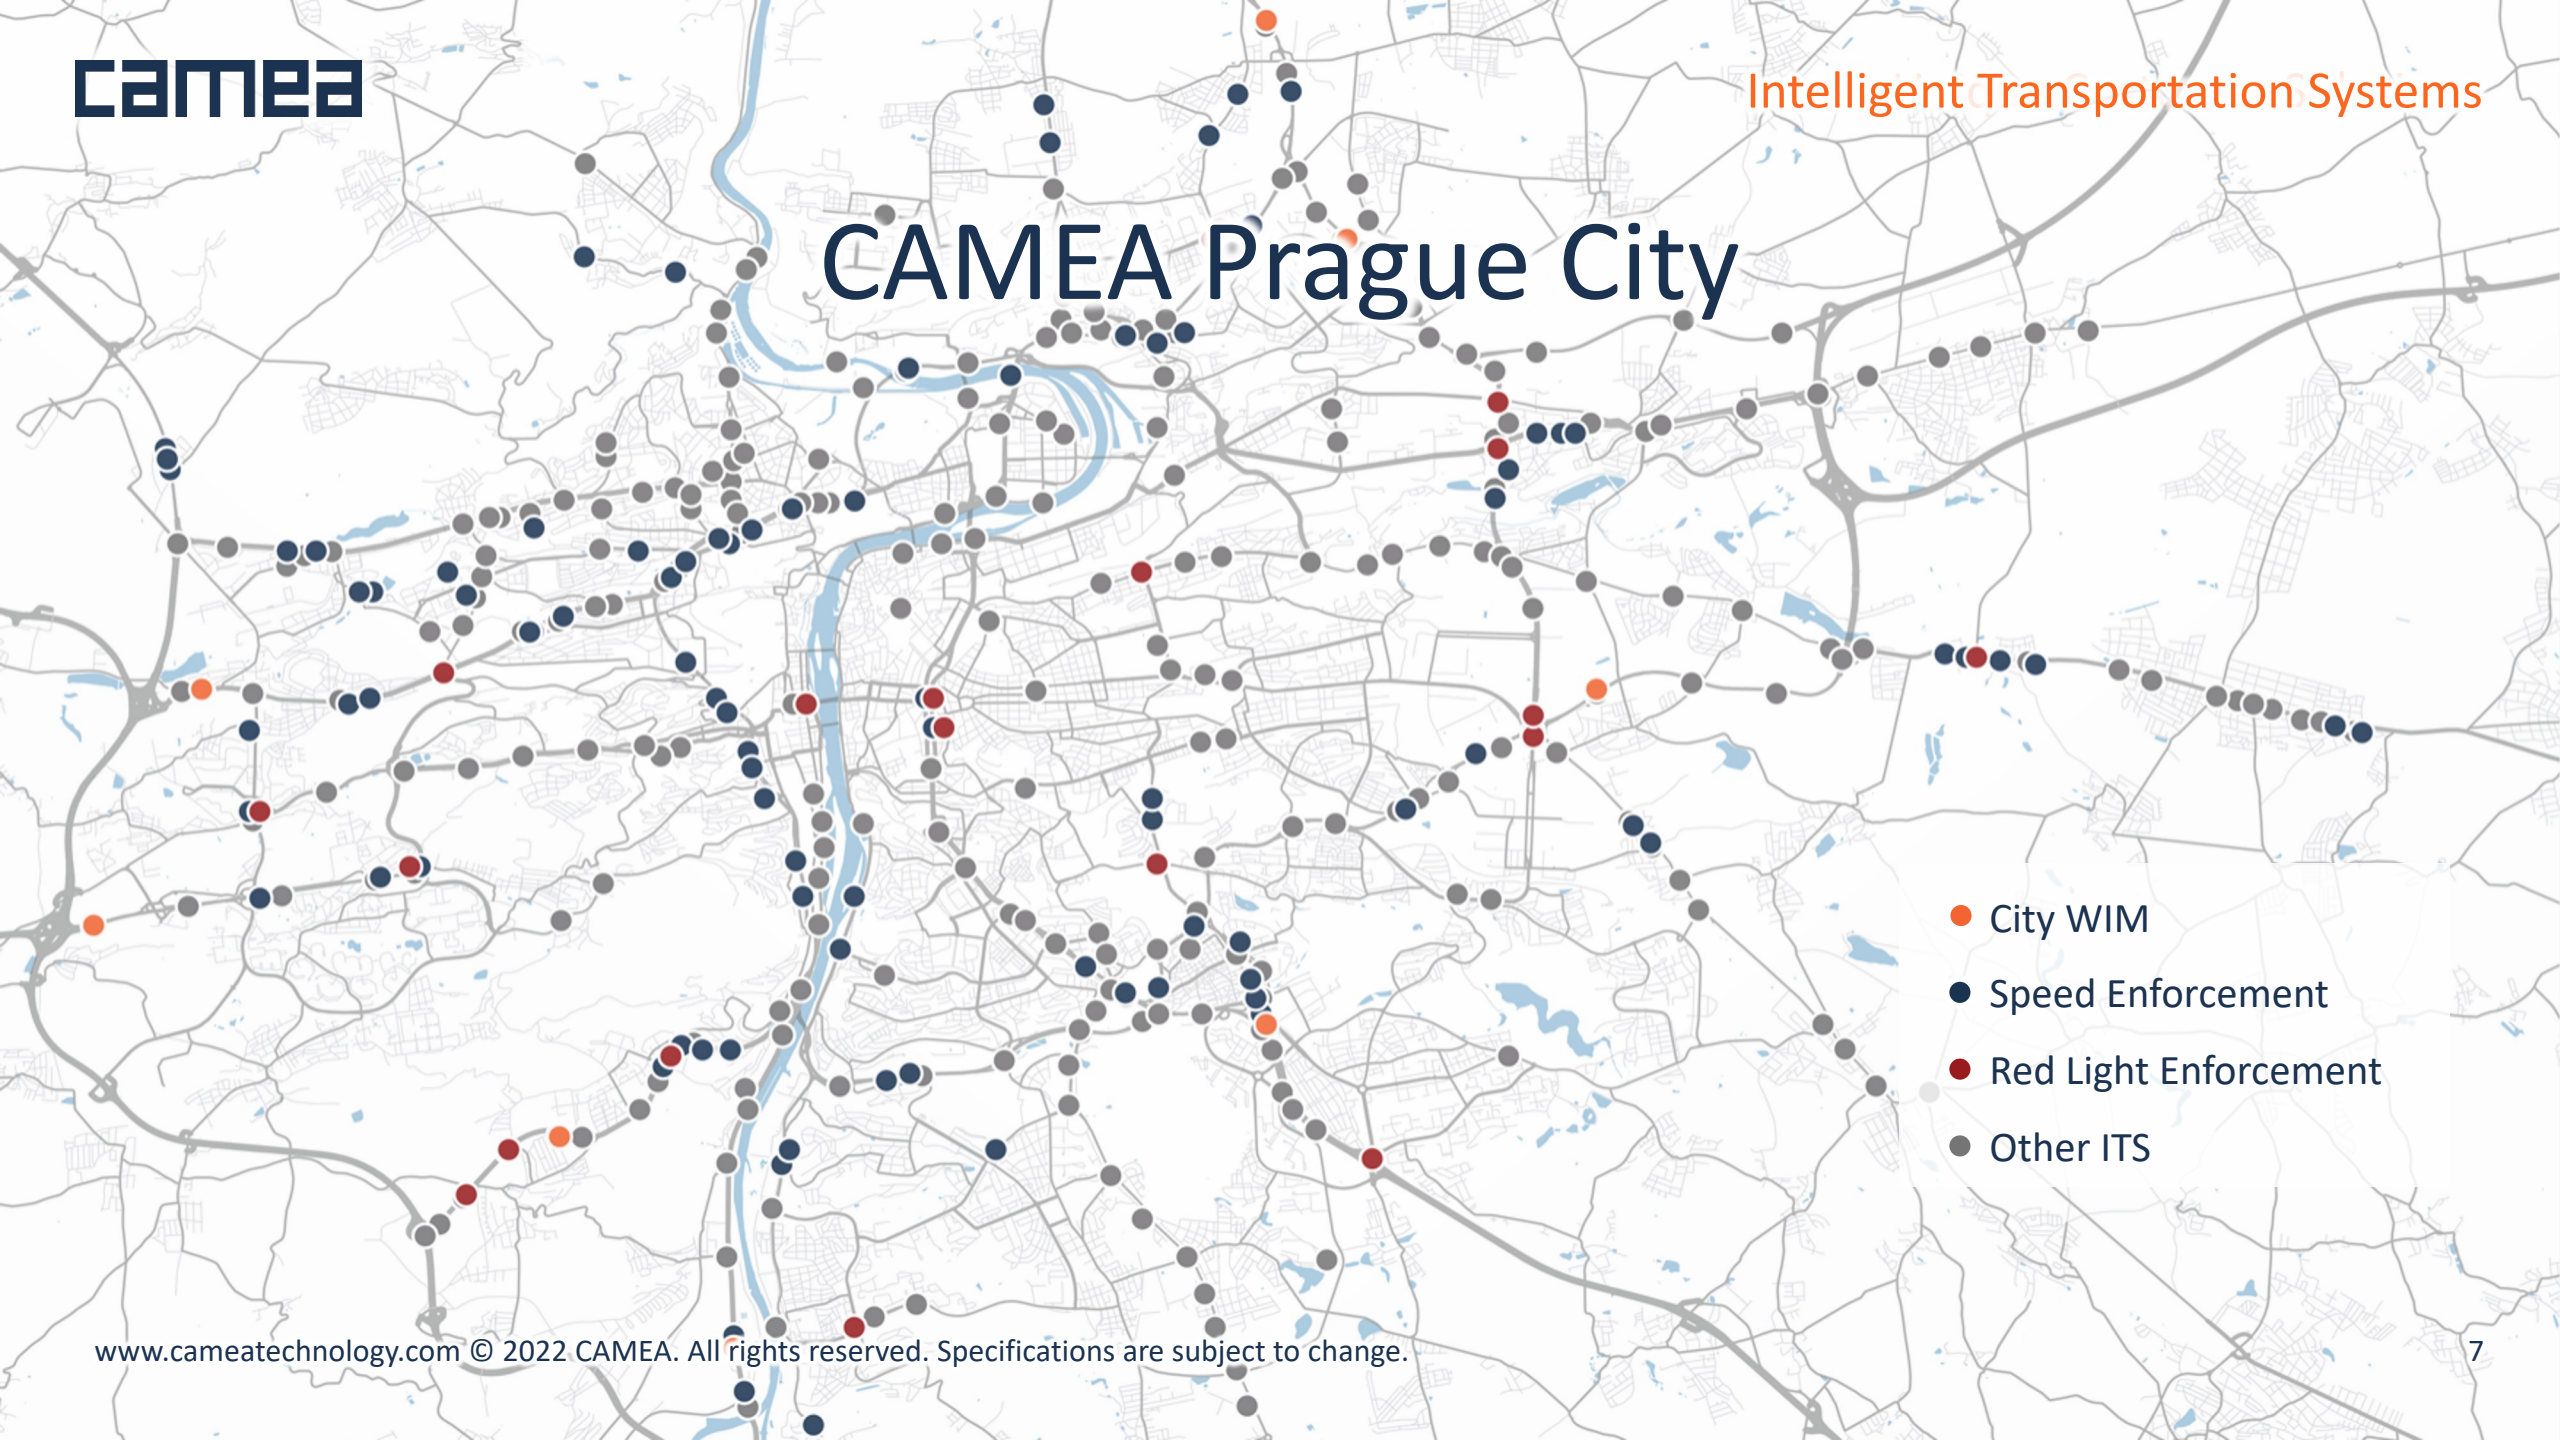

CAMEA Worldwide

CAMEA – Direct Enforcement Expert

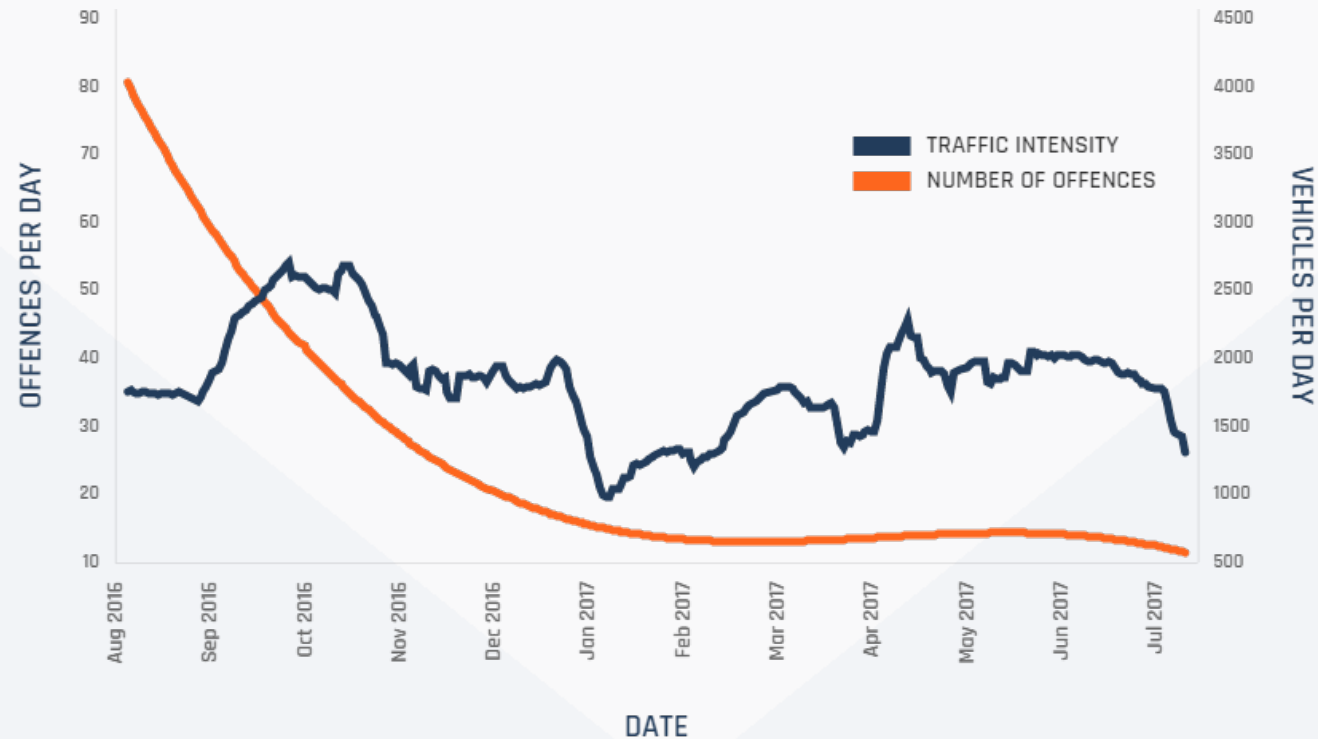

CAMEA Prague City

- 
- The map displays the city of Prague with its street network and the Vltava River. Various colored dots are placed along the roads to indicate the locations of different Intelligent Transportation Systems (ITS) components. A legend in the bottom right corner identifies these components: orange dots for City WIM, dark blue dots for Speed Enforcement, red dots for Red Light Enforcement, and grey dots for Other ITS. The dots are densely clustered in the central urban areas and along major thoroughfares.
- City WIM
 - Speed Enforcement
 - Red Light Enforcement
 - Other ITS

CAMEA Speed Enforcement

The number of speeding drivers is typically reduced by around 80 % within a few months after the installation.
